PROFESSIONAL SUMMARY

Full Stack Developer with 2.5 years of experience building scalable web applications, REST APIs, automation systems, and e-commerce platforms using PHP, Laravel, MySQL, and JavaScript. Experienced in designing backend architectures, integrating third-party APIs, implementing authentication systems, payment gateways, and business process automation. Contributed to 20+ production applications across e-commerce, marketplace, logistics, and web platform domains.

TECHNICAL SKILLS

Backend: PHP, Laravel, MySQL, REST API Development

Frontend: HTML5, CSS3, jQuery

E-Commerce Platforms: CS-Cart, Shopify and TikTok Shop

APIs & Integrations: Third-Party API Integrations, Shopify GraphQL API, ShipStation, Shippo, Tookan, EasyParcel, Algolia Search, Fakturoid

Tools: Git, GitHub, Linux, Postman

CORE EXPERTISE

- PHP & Laravel Development
- API Development & Integration
- Payment Gateway Integration
- Marketplace Connector Automation
- Shipping & Fulfillment API Integration
- Multi-vendor E-Commerce Systems
- Custom Add-on Development

WORK EXPERIENCE

Full Stack Developer — Esteplogic | *March 2024 – October 2026*

- Develop and maintain custom web applications, APIs, and e-commerce solutions for international clients across multiple industries.
- Built marketplace synchronization systems integrating Shopify, TikTok, eBay, WooCommerce, and other platforms with CS-Cart.
- Implemented shipping and fulfillment automation using ShipStation, Shippo, Tookan, and EasyParcel integrations.
- Integrated payment gateways including Tap Pay and Tamara
- Developed and integrated APIs and mobile application support modules for client projects.
- Created custom add-ons including Algolia search, invoicing, auction, and data migration systems
- Researched, developed, and published apps on the Shopify App Store and TikTok App Marketplace.

- Contributed to 20+ e-commerce projects across dropshipping, apparel, bookstore, and B2B domains.

KEY PROJECTS

Edropship — Handled end-to-end development of a large-scale dropshipping platform managing thousands of products with inventory synchronization, queue-based processing, order management, and marketplace automation workflows.

MyEventPromo — Developed the backend architecture and APIs for an event booking platform using Laravel and MySQL. Designed and implemented event management, ticket booking workflows, user authentication, and administrative functionality. Built REST APIs to support the React frontend and integrated business logic for event scheduling, booking management, and user operations.

NidaDanish — Developed custom e-commerce features, REST API integrations, and frontend design enhancements to support mobile application functionality and improve user experience. Implemented Tookan delivery integration and customized operational workflows to streamline order processing and platform operations.

Foodiez Delight — Developed a full-stack catering and food ordering platform using Laravel and MySQL. Built frontend interfaces, backend modules, and APIs for menu management, package customization, customer inquiries, and order processing. Designed database structures and administrative functionality to support day-to-day business operations.

Landbapparel — Implemented custom B2B integration with Faire for automated wholesale order and product synchronization workflows on an apparel e-commerce platform. Developed frontend enhancements and custom e-commerce functionality to improve storefront performance and operational efficiency.

Clinicsandco — Developed custom functionality and frontend enhancements for a healthcare marketplace platform. Built custom add-ons and marketplace connector workflows to synchronize products, inventory, and order data across multiple storefronts and improve operational efficiency.

PROFESSIONAL HIGHLIGHTS

- Developed and maintained 10+ production-grade custom add-ons and integration modules.
- Worked on 20+ live international e-commerce projects across multiple business domains.
- Published marketplace applications on Shopify App Store and TikTok Marketplace.
- Built automation workflows for marketplace synchronization, inventory management, and order processing systems.

TRAINING

Full Stack Web Development Training — IKTS Software Solutions | *2023*

- Completed intensive training in PHP, Laravel, JavaScript, MySQL, MVC architecture, and web development fundamentals.
- Built foundational skills in frontend development, responsive design, and database-driven web applications.

EDUCATION

Bachelor of Science in Computer Science

S.R.P.A Adarsh Bhartiya College, Pathankot | *2017 – 2020* | *First Division*
